

Committed to Excellence

CTS launches new Tanker department

CTS is proud to announce the launch of our new division, named CTS Specialised Products. We will mainly focus on road tankers and other specialised products, including repairs. The new venture is headed by Albert Liebenberg, well respected in the tanker industry, who's knowledge, experience and contacts made him the obvious choice.

CTS Specialised Products is based at our Paarl branch and became operational in August 2013. It is with great elation that we celebrate the delivery of our first 5 units in January 2014. We are very excited by the new market opportunities this division is affording us.

For more information regarding tankers, feel free to contact us on details below

Pahltech at the Bauma Africa

Pahltech Trading was looking for a showcase opportunity and decided to launch the new products on offer, at the "Bauma Africa 2013"

This was held on the 18-21 September 2013 at the Gallacher Estate, Midrand, and proved to be the perfect opportunity, measuring the amount of visitors, interest and orders signed

There were particularly a lot of interest in the Maxilift cranes and Tommylift tailgates, proving a huge market demand for these product ranges
